GAME INSTRUCTIONS

Select one of the seven themed game cards and insert it into the slot at the top of the board. Avoid looking at the pictures on the card and ensure all the doors are closed. Decide which player will use the red score tracker, and which player will use the blue score tracker.

The younger player goes first. Players take turns opening two doors, one at a time. If the pictures behind the doors match, the two doors remain open, and the player scores a point on his/her score tracker. This player continues playing until failing to make a match. When the pictures behind two selected doors do not match, the doors are shut and it becomes the next player's turn.

The object of the game is to find more matches than the other player. The player having the most points after all of the matches have been made is declared the winner. If the players finish with the same number of matches, the game is a draw.
